Beehive Assessment Offer

The assessment offer for Beehive is informed by assessment for learning principles. We have developed a test suite that optimizes the learning journey, offering valuable insights as students progress through the level.

TEST PACKAGE

Test Type	Description and purpose	When to assign
Entry Test	The result of this test recommends the best course level for a student to start the school year with. The test is accompanied by a mapping document that translates students' scores to a specific level of your chosen course.	Before assigning course level to students
Unit Tests	The unit test focusses on learning objectives covered within the unit. It offers a snapshot of where learning has been successful. Results and ensuing feedback can define next steps.	At the end of each unit
Progress Tests	The test assesses the progress made by students in relation to a defined group of units. It measures the learning that has taken place within this set of units and helps identify student's progress.	At the end of a group of units
End-of-year Test	This summative test focuses on what students have learned during the course level. It reports on their overall achievement for the year.	At the end of the course level

TESTS CONSTRUCT

Beehive tests are carefully created according to guidelines and specifications to ensure confidence in the results. The tests offer useful insight into progress and next steps for both teacher and student. The following features facilitate an assessment for learning experience:

1) **Learning objectives** – every activity is clearly aligned to a target learning objective, e.g. *Grammar: past habits*. Each learning objective is tested with a set of questions. The result will give you an unambiguous indication of students' learning by target learning objective. This in turn will inform any remedial and extension work follow-up.

2) **Feedback box** – each test provides space for the total score and more importantly an area for a dialogue between you and your learners.
3) **Clear scoring** – the tests promote a transparent and easy to manage scoring system. This ensures students are exposed to enough content to assess their learning and allows for consistent reporting.
