

Background

Online services

Do you read fashion magazines and look at dresses by famous designers and think, 'How beautiful!'? Unfortunately, these dresses are **expensive**. We can't all pay one thousand dollars for one dress for one **special occasion**.

However, a new website has the **solution**. *Rent the runway* rents expensive dresses for one night. You choose from hundreds of dresses and order them *online. Then they deliver it for the special day. So now you can wear a dress from a famous fashion designer but you only pay one hundred dollars – not one thousand dollars! After you wear the dress, you put it in an envelope and send it back. The price includes cleaning.

So renting online is now big business. The company *Netflix* is a good example. You pay a **monthly subscription** and then you order your DVDs. Netflix

delivers the DVD in a day and you have the film for an *unlimited time – there are no **late fees**. Now, the company also rents computer games and customers can also watch films online at the Netflix website.

And if you can rent clothes, videos and computer games online, why not children's toys? Lori Pope is a young mother with two children. When she buys toys her children play with them for a few weeks and then don't use them. Now, Lori provides the perfect service with her company, *Baby Plays*. Her customers pay a subscription every month and she delivers four new toys. Now she has over 200 **regular customers** with lots of happy children!

So do you have a good business plan for online renting? Great, but be quick. Lots of other people do too!

Glossary

*online = on the Internet

*unlimited time = no end date
