Dear Councillor Addams,

I am writing to insist that the factory chicken farm that is opening on Mill Road be immediately closed. I am sure that I speak for our whole community when I say that factory farming has a devastating effect on our environment and the people of Bellsbrook do not want it. My reasons are truly clear; factory farming is a lead contributor to greenhouse gas emissions and deforestation, both of which have a huge effect on climate change. Factory farming would also significantly affect our local community. I am sure you would agree that we should all do our part to save our planet and take steps to reduce our impact on the environment. Closing the Mill Road factory farm is a positive step towards this goal.

Firstly, did you know that industrialised animal agriculture is responsible for about 10% of greenhouse emissions in Australia? In fact, factory farming is the leading emitter of two short-lived climate pollutants, nitrous oxide and methane. These gases contribute to the greenhouse effect which in turn warms our climate. This is extremely dangerous for our community because climate change has been linked to harsher and more frequent droughts and I am sure I do not need to remind you Councillor Addams of the effects of drought on our famers. Thankfully, by closing the factory farm and supporting our smaller producers, this will really help in reducing our carbon footprint. After all, who wants to pay astronomical prices for produce?

Secondly, industrialised animal agriculture leads to deforestation and deforestation is responsible for 8-10% of greenhouse gas emissions in Australia. You know Bellsbrook Forest is right next to that factory farm and I am quite sure that over time that farm is going to need more space to grow feed for all those chickens. In your last campaign speech, you mentioned how much you

liked to walk your dogs through that forest and I am sure you would hate to see it destroyed. All our community use Bellsbrook Forest for all sorts of recreation. It would be such a shame to lose it. Deforestation is devastating to our environment because forest vegetation absorbs carbon, keeping it out of our atmosphere. Surely you can see how terrible this farm is for our community.

Finally, the impact of this factory farm on our community would be a negative one. Our local free-range chicken farms would not survive and our town would be polluted by the noise and smell of such an eyesore. Bellsbrook is such a beautiful town with a strong community that will change dramatically if this farm is not shut down immediately.

Councillor Addams, I am sure you can see by my arguments that closing the factory chicken farm that has opened on Mill Road is a wise decision for our town.

Yours Sincerely,

Holly Richards

I am writing to insist that the factory chicken farm that is opening on Mill Road be immediately closed. My reasons are clear; factory farming emits greenhouse gasses and causes deforestation, both of which have a huge effect on climate change. Factory farming would also affect our local community.

Firstly, did you know that factory farming is responsible for about 10% of greenhouse emissions in Australia? These greenhouse emissions cause climate change. This is extremely dangerous for our community because climate change causes drought. Thankfully, by closing the factory farm and supporting our smaller producers, this will really help in reducing our carbon footprint. After all, who wants to pay astronomical prices for produce?

Secondly, factory farming leads to deforestation and deforestation is responsible for 8-10% of greenhouse gas emissions in Australia. You know Bellsbrook Forest is right next to that factory farm and I am quite sure that over time that farm is going to need more space to grow feed for all those chickens. All our community use Bellsbrook Forest for all sorts of recreation. It would be such a shame to lose it. Losing our forest is devastating to our environment because forest vegetation absorbs carbon, keeping it out of our atmosphere. Surely you can see how terrible this farm is for our community.

Finally, the impact of this factory farm on our community would be a negative one. Our local free-range chicken farms would not survive and our town would be polluted by the noise and smell of such an eyesore. Bellsbrook is such a beautiful town with a strong community that will change dramatically if this farm is not shut down immediately.

Councillor Addams, I am sure you can see by my arguments that closing the factory chicken farm that has opened on Mill Road is a wise decision for our town.

Yours Sincerely,

Holly Richards
