

The Train Station

- Look at the picture. Talk about what is going on.
- What place is shown in the picture? Do you know of any places like this that are near where you live?
- Why do people come to these places?
- What must people do before they can board a train? Where will they do this and how will they know what to do?
- What is a timetable? Why is it a good idea to have a clock in a train station?
- What noises would you be likely to hear in this place? What would make these noises, do you think?
- Who works in train stations and on trains? What jobs do these people do?
- Where are train stations usually built? Why are they sometimes underground?
- Older people, or passengers with disabilities, might find it difficult to get around the train station. What things might people do to make it easier for them to use the train station and the train?
- Can you think of any other ways passengers might make their journey if the train was not working? Make a list of all the other types of transport you can think of.
