

Great Galapagos

11 Thank you for joining us today; my name is David and
22 I will be your tour guide. The Pacific Ocean and the
30 enchanted volcanic islands of Galapagos are places unlike
40 any other. They are home to an incredible collection of
49 animals who have adapted to the harsh landscape around
58 them. Most of them were discovered by an astounded
69 Charles Darwin on his first trip to these islands over two
72 hundred years ago.

83 On our right, you can see one of the islands' most
90 remarkable inhabitants – the giant tortoise. There are
102 hundreds of them on the beach at any time, lying in the
112 sun to warm their blood and gather energy. Many may
124 be older than you are right now and some will live for
130 over one hundred years. Impressive, right?

Quick Questions

1. Who discovered most of the animals on the Galapagos Islands?

2. Sum up the second paragraph in 20 words or less.

3. How has the author made the Galapagos Islands sound special within the text?

4. Name one other creature you could expect to see on this tour.

Answers

1. Who discovered most of the animals on the Galapagos Islands?

Charles Darwin

2. Sum up the second paragraph in 20 words or less.

Accept any reasonable summary of information from the second paragraph in 20 words or less.

3. How has the author made the Galapagos Islands sound special within the text?

Accept answers which discuss use of exciting adjectives (enchanted / incredible), and saying 'place unlike any other'.

4. Name one other creature you could expect to see on this tour.

Accept any reasonable prediction which would fit on a Pacific island tour or anything Darwin famously discovered, e.g. beach life (star fish, hermit crab), fish, insects, birds.
