

# Fireworks in a Jar

## Directions:

- 1) Fill the glass jar about  $\frac{3}{4}$  full with water.
- 2) In a separate bowl, use a fork to mix four tablespoons of oil and four drops of each food coloring color you choose.
- 3) Gently and slowly, pour the oil mixture into the jar of water.
- 4) Watch as the food coloring slowly sinks, passing through the oil and into the water.

## You will need:

- glass jar
- oil
- water
- food coloring
- bowl

The food coloring will expand and begin to mix with the other colors and water to make a “firework!”
